#### **All Programs**

*Provost Council approved 4/12/23*

#### **Policy for a Schoolwide Moodle Grading Aggregation Method**

LPU will have one schoolwide Moodle grading aggregation method. The standardized grading method will be a combination of the *Weighted Mean of Grade* and *Simple Weighted Mean of Grade*. With this method, professors can categorize grade items and assign a percentage weight to each category, accommodating additional "extra credit" items that may be added during the semester. Under this policy, professors who need to modify their grade book will need to seek the assistance of the Moodle administrator.

This policy addresses a significant issue wherein inaccurate course grades are generated when professors adjust grade items or add extra credit points during the semester. Fixing grade book issues demands a substantial amount of time from the Moodle administrator. This policy also ensures that all gradable items in Moodle accurately reflect the gradable items stated in the course outlines and the time-to-task sheets.
